

Ethical Use of AI

By:

Sammak Shinde
FS-Prime AI Group,
CDAC Pune

Agenda

- Bias and Fairness
- Governance and Regulations by Indian Govt.
- Privacy and Data Protection
- Accountability matrix
- Ensuring inclusivity
- Autonomous systems and safety
- Unethical use of AI in software applications
- Introduction to Ethical AI Tools/ services

AI BIAS AND FAIRNESS

1

**Identify
potential
biases**

2

**Define
fairness
criteria**

3

**Audit
training
data**

4

**Mitigate
bias in
data**

5

**Evaluate
algorithmic
fairness**

Governance and Regulations by the Indian Government

- IT Act, 2000
- DPDP Act, 2023
- NITI Ayog's "National Strategy for Artificial Intelligence" , 2018
- India's AI Act drafted by MEITY

Privacy and Data Protection

- AI models rely on Data.
- Ensures trust
- E.g. DPDP Act India, GDPR Act EU etc

Credits: ESG
HOLIST

Accountability Matrix

- AI Developers
- Different Organizations developing AI
- Government

Ensuring Inclusivity

- Need: Avoiding any marginalized group.
- All groups/stakeholders during Data Collection

Credits: STAT
News

Autonomous Systems and Safety

Credits:
Udacity

- Reliability & Robustness
- Decision Transparency
- Ethical Decision-Making
- Human Oversight & Trust

Cybersecurity, Biometrics

Unethical Use of AI in Software Applications

- E.g. Deepfakes, Manipulative Algorithm etc.
- Harm to Individual & Society

Introduction to Ethical AI Tools/Services

- AIF360 by IBM
- Google's What If Tool
- FairTorch: A Pytorch Responsible AI Framework
- Microsoft Responsible AI ToolBox
- UNESCO's AI Ethics Framework
